MEET THE CHIROPRACTOR:

Dr. Medina graduated from Parker University in Dallas, Texas with highest honors in 2020. He holds a license in the state of Nevada and has experience treating many different types of patients, including athletes and auto accidents. While in chiropractic school, Dr. Medina had the opportunity to work with athletes in the Sports Performance Program as well as work in multidisciplinary setting treating veterans at the North Texas VA Hospital. He was involved in multiple clubs and activities while in school and was also a tutor.

Dr. Medina was first introduced to chiropractic in high school when a low back injury sidelined him at the end of the football season. After many different forms of treatment, he tried chiropractic and found relief for his pain. With continued treatment he was able to continue to play until college. When his football career was over, he decided to change career paths and work towards becoming a chiropractor to help others in the same way.

“It was rewarding to be able to see how chiropractic can change someone’s life and how big of an improvement they can have in their quality of life. Originally from Colorado, Dr. Medina is brand new to the Henderson area and Nevada. “I have really enjoyed living here and working with such great people.”

Dr. Chandler Medina
